HARSHUL VISHWAKARMA

Senior Software Engineer / Full-Stack Developer
Pune, India | +91-7771090500 | harshul1911@gmail.com | https://linkedin.com/in/harshulv

PROFESSIONAL SUMMARY

Results-driven **Software Engineer & Full-Stack Developer** with 8+ years of experience building scalable enterprise applications, modern web systems, and intelligent solutions. Specialized in **Agentic AI, Generative AI, Web & Android Development, and Microservices Architecture**. Proven track record of translating complex business needs into production-ready software, driving code reviews, and leading cross-functional Agile engineering teams.

TECHNICAL SKILLS

AI & Mobile Development: Agentic AI, Generative AI, LLMs, AI Agents, Android Development (Kotlin/Java, Android SDK), Mobile App Development

Full-Stack & Web Engineering: Python, JavaScript, TypeScript, React, Node.js, Express, AngularJS, HTML5, CSS3, Bootstrap, REST/SOAP APIs, Microservices

Cloud, DevOps & Data: SQL, PyTest, PyTorch, Docker, Kubernetes, CI/CD Pipelines, Apache Airflow, Git, Linux, Google Cloud Platform (GCP)

Methodologies & Practices: Agile/Scrum, Sprint Planning, Code Reviews, Unit Testing, Debugging & RCA, Technical Documentation, Software Architecture

PROFESSIONAL EXPERIENCE

Logituit - Bangalore / Pune, India

Jan 2022 - Present | Senior Software Engineer & Technical Consultant

SSE & Technical Consultant
Sep 2025 - Present

- Architected and integrated Agentic AI workflows and Generative AI models into enterprise web and mobile applications to automate dynamic decision-making processes.
- Designed, developed, and deployed scalable, maintainable software applications and RESTful microservices using Python and JavaScript to automate complex enterprise workflows.
- Collaborated directly with cross-functional teams, product managers, and client stakeholders to gather requirements and translate business logic into robust technical specifications.
- Participated in and led code reviews, enforcing best practices, code quality standards, and automated unit testing using PyTest to ensure system reliability and maintainability.
- Built secure API integrations with OAuth 2.0, SAML, and SSO authentication mechanisms for seamless cross-platform microservice communications.
- Identified, troubleshoot, and resolved software defects and performance bottlenecks, conducting root cause analysis (RCA) across development, testing, and production environments.

Senior Software Engineer
Sep 2024 - Aug 2025

- Engineered cross-platform responsive web applications and native Android features using modern full-stack web technologies and Android SDK.
- Developed responsive web application components, UI elements, and custom dashboards using JavaScript, AngularJS, and Bootstrap to enhance user experience.
- Built automated data processing and ETL pipelines using Apache Airflow and optimized SQL queries and database schemas for backend services.
- Active participant in Agile/Scrum ceremonies, including sprint planning, daily standups, backlog grooming, and sprint demos for key stakeholders.
- Wrote and executed unit and integration test suites, supported User Acceptance Testing (UAT), and maintained high code reliability standards.

Voltamosys Technology - Ahmedabad, India

Junior/Executive Software Engineer
Jun 2019 - Jul 2020

- Designed custom database objects, SQL schemas, data access control lists (ACLs), and business rules for tailored operational software workflows.
- Developed Python scripts and REST/SOAP API integrations connecting web applications with third-party data sources and microservices.
- Implemented SAML, SSO, and user access governance protocols across enterprise applications using Git for version control.

Discretemicros - Jabalpur, India

Associate Trainee
Jun 2018 - Jun 2019

- Developed client scripts, UI actions, and catalog interfaces to optimize service workflows and user interfaces.
- Authored unit test cases and functional checks for web service APIs and database scripts to improve software stability. • Created comprehensive technical support guides, FAQs, and documentation while collaborating in Agile sprint teams.

EDUCATION

Bachelor of Engineering – Computer Science
Gyan Ganga Institute of Technology & Sciences | 2013 – 2017 | 7.10 CGPA

CERTIFICATIONS

- Google Cloud Certified - Introduction to Generative AI & AI Agents

LANGUAGES

English – Full Professional Proficiency | Hindi – Native / Bilingual Proficiency
