WORK EXPERIENCE

Senior Software Engineer

Logituit

01/2022 - Present

Bangalore/Pune

Key Contributions

- Develop and maintain Android Mobile and TV features using Kotlin, Jetpack components and scalable MVVM-based architecture.
- Modernized legacy Java modules to Kotlin and improved maintainability across multiple build variants and release configurations.
- Contributed to OTT products including MeWatch/CNA, focusing on feature delivery, UI/UX improvements, playback experiences, optimization and production reliability.
- Built unit-test coverage from scratch for key modules and helped standardize testing practices across the team.
- Refactored networking and reactive layers using RxJava/RxAndroid while applying modern Android development best practices.

Executive Android Developer

Voltamosys Technology

06/2019 - 07/2020

Ahmedabad

Key Contributions

- Designed and implemented Android features in Java and Kotlin using Jetpack components and reusable application modules.
- Implemented notification-listening and background-processing capabilities for Android devices.
- Owned bug fixing, quality improvements and periodic production releases while coordinating with stakeholders.

Junior Android Developer

Discretemicros

06/2018 - 06/2019

Jabalpur

Key Contributions

- Delivered Android features in an Agile environment and demonstrated completed functionality directly to clients.
- Wrote unit tests, handled edge cases, resolved defects and improved application performance and usability.
- Designed scalable modules using Android best practices for maintainable, high-performance applications.

EDUCATION

Bachelor's in Computer Science

Gyan Ganga Institute of Technology & Sciences

2013 - 2017

7.10 CGPA

Intermediate

GGSK Higher Secondary

2011 - 2013

60.0%

SKILLS

Kotlin Multiplatform

Kotlin

Jetpack Compose

Android TV

ExoPlayer

Ktor / Koin

Room DB

MVVM

Dagger / Hilt

Retrofit

Unit Testing

Android Security

Git

CI/CD

Java

PROJECTS

MeWatch, CNA (Mediacorp)

- Worked on Android/TV streaming experiences for shows, movies and live broadcasts.
- Delivered features, UI/UX improvements, testing, debugging and performance/reliability optimizations.

JioCinema, News18 (Viacom18)

- Contributed to Android frontend development for large-scale OTT/media products and on-demand playback experiences.
- Worked within an ecosystem involving API integration, DRM, CI/CD, monitoring, security and scalable content delivery.

Voot / Voot Kids (Viacom18)

- Built and supported streaming features for on-demand entertainment applications with focus on stability and user experience.

Other Projects

- Logistics management app in React Native and Android utility applications including a background voice recorder.
- Location tracking using HTTPS, WebSocket and Socket communication; Anocab product-authenticity app; real-time Android interaction/screenshot prototype.
